

Lifting and Slinging In-House Instructor Course

Information :

This is a 5 day course. Up to two operators can be trained on this 5 day course.

The candidate(s) must have an operators' certificate from an Accredited Training Company (i.e. not an In House certificate). The operator must have attended a refresher course within the last 6 months. The In House Instructor can train and test their company's employees only on trucks / equipment for which they themselves have an operators certificate from an Accredited Training Company.

Requirements :

1. A classroom for the duration of the 5 day course
2. Slings in full working order and access to an area for practical elements.
3. A copy of relevant certification
4. A copy of the operator's certificate of training achievement must be sent to QTS prior to attending an In House Instructor Course. The certificate must have been issued by an Accredited Training Company and confirm that they have attended a refresher course within the last 6 months.
5. Candidates attending the course must have the desire to teach.

Assessments:

Each trainee is assessed on the following elements throughout the course:

1. Health and Safety at Work.
2. Recommendations of Training
3. Instructional Techniques
4. Operators Ability
5. Classroom Lesson
6. Practical Demonstration
7. Practical Lesson
8. Basic Skills Test
9. Report Writing

Elements 1–3 are a 55 Multi-Choice question paper and 5 open questions. A 100% pass mark is required on all theory tests.

Element 4 requires the trainee to pass an operators test on the Slinger Banksman Operation.

Element 5 requires the trainee to demonstrate their ability to conduct a classroom lesson on a theoretical subject related to the Slinger Banksman operation, i.e. Lifting Capabilities, Lifting Techniques, Health & Safety at Work Act etc. This is to assess their basic instructional techniques.

ELEMENT 6 requires the trainee to carry out a demonstration on a lesson of the tutors choice related to the Slinger Banksman operation, i.e. Correct lifting techniques, Inspection & Selection of lifting equipment. This is to assess them demonstrating a manoeuvre without any errors.

ELEMENT 7 requires the trainee to carry out a practical lesson on a subject related to slinger banksman operations. This is to assess their ability on student participation, confirmation techniques and basic instructional techniques.

ELEMENT 8 requires the trainee to construct a test area and conduct and mark a basic skills test to ITSSAR standards and complete the relevant paperwork.

ELEMENT 9 requires the trainee to write a report related to slinger banksman operator training i.e. a report on a student who has failed a course.

Assessment on all the above elements will be carried out throughout the five day course. If any of the trainees are referred on any of the above elements, further assessments will be required until they pass that element. This can be done on the course given the availability of spare time within the programme or can be carried out at a later date.

Each successful trainee is issued with a certificate of training achievement to confirm they have been trained to ITSSAR standards, and also an ID card and these last for 5 years after which a refresher course is required.
